National and International Assessments

Spring/Summer 2016

What's Happening in the World of NAEP?

Spring 2016

- Results from the NAEP 2014 technology and engineering literacy (TEL) assessment conducted in grade 8 will be released in May 2016.

Fall 2016

- Results from the NAEP 2015 science assessment conducted in grade 8 will be released.

Winter 2017

- Assessment window:
January 30 – March 10, 2017
- Grades 4 and 8: Mathematics, reading, and writing
- Pilot assessments on tablets –
Grades 4 and 8: Civics, geography, mathematics, reading, and U.S. history

Thank You!

Thank you to all schools that participated in the National Assessment of Educational Progress (NAEP) 2016 assessments and helped make it a success. The assessments were administered between January and March. Students participated in one of the following assessments: arts (grade 8), mathematics (grades 4 and 8), reading (grades 4 and 8), and writing (grade 8). The arts assessment was administered in paper-and-pencil format. Results from the arts assessment will be released as [The Nation's Report Card](http://nces.ed.gov/nationsreportcard) at the national level.

The mathematics, reading, and writing assessments were tablet-based pilots. Results from the 2016 pilot will not be released, but they will be used to prepare for the full transition to digitally based assessments scheduled for administration in 2017.

Digitally Based Assessment Tutorials

NAEP is using the latest technology available to deliver assessments to students. At the beginning of each assessment, students will take a brief interactive tutorial designed to familiarize students with the system and the tools they use to take the assessment. Some of the on-screen interactive tools may be familiar to students, while others may be unique to the NAEP assessment. Each assessment begins with a short tutorial that demonstrates these tools so that students may use them effectively during the assessment. Some parts of the tutorials are the same across subjects, while other parts are specific to each subject. For example, because mathematics uses different tools at each grade, there are different tutorials for each grade in mathematics.

You can now experience the same tutorial, either by tablet or computer, shown to students at the beginning of a NAEP assessment.

Tutorials for the 2016 assessments follow an introductory video. You can access subject- and grade level-specific tutorials by clicking on the image below.

Digitally Based Assessments

Since 2001, NAEP has been exploring new testing methods and item types that reflect the growing use of technology in education. As computers and digital tools play an increasingly important role in the classroom, NAEP is advancing with digitally based assessments (DBAs) to measure what the nation's students know in key academic subjects.

The NAEP program is in the midst of transitioning all of its assessments to digitally based content and delivery. Beginning in 2017, the NAEP [mathematics](#), [reading](#), and [writing](#) assessments will be administered to students in grades 4 and 8 throughout the nation on NAEP-provided tablets. For mathematics and reading, it will be the first time that NAEP will report national and public school results collected via tablets.

NAEP representatives will provide significant support to schools, bring all necessary materials and equipment,

and administer the assessment. Most fourth- and eighth-grade students will take the mathematics and reading assessments on tablets with keyboards. A subset of students will take paper-and-pencil versions of the assessment. NAEP is administering the assessments via both tablets and paper booklets to evaluate any differences in student performance. Each student will be assessed in one format and one subject only.

NAEP will also administer writing assessments on tablets with keyboards at grades 4 and 8. Some students in these schools will be selected for pilot assessments on tablets for mathematics and reading at grades 4 and 8, and civics, geography, and U.S. history at grade 8 only. Results from these pilot assessments will not be released but will be used to inform future NAEP assessments.

National and International Assessments

During the 2016-2017 school year, NCES will recruit for, administer, and release the results of national and international assessments. The [calendar below](#)

provides a general time frame of when various national and international assessment activities occur.

National and International Assessment Activities

2016/2017

RECRUIT

ADMINISTER

RELEASE

During the 2016–2017 school year, NCES will recruit for, administer, and release the results of national and international assessments, as well as other longitudinal studies, at grades K through 12.

Summer 2016	Fall 2016	Winter 2016/2017	Spring 2017
